

**Retail price guide**

---

2023 / 2024

“Gobuddy aims to create **sustainable improvements** in society and the retail industry at large. A platform that empowers, enables, and provides opportunity to businesses and individuals.”

## Distance is not a factor

Long distance, short distance, across the country, within a city, the fact is, distance is not a factor in Gobuddy's pricing methodology. Gobuddy leverages existing trips that will already happen, connecting people already moving on the same route that your delivery has to travel. This technology provides you with the most affordable delivery service, eliminating the additional outlying area fees that normal courier companies charge.

## Fair compensation

The Gobuddy platform gives ordinary people an opportunity to earn money by picking up and dropping off goods during their daily travels. Gobuddy transporters provide their time and travel routes as a means to facilitate deliveries for others. Each transporter undergoes rigorous multi-level verification to qualify as a Gobuddy transporter. The fact is, 99% of people are good, and would appreciate the opportunity to be empowered!

# Door-to-Door Delivery

“ Online delivery should be fair and affordable, contributing to the success of a business. ”

Our approach to treating customers fairly is aimed at providing the most affordable door to door delivery. Gobuddy's delivery network will open up new and exciting markets for retailers who want to expand their products into under served communities. Our pricing helps retailers expand their reach, improve their profitability, reduce their carbon emissions footprint and give them access to a new world of opportunity.

Prices exclude VAT

Weight	Price
0kg to 3kg	R59.99
3kg to 20kg	R79.99
20kg to 50kg	R149.99
50kg to 100kg	R349.99

# Insurance

Intelligent system technology.

- Gobuddy has Goods In Transit insurance with one of the leading insurers in South Africa. Our claims notification process is automated with industry leading settlement turn around.
- Insurance claims for damaged goods can be done directly from your business dashboard, it's that simple.

With intelligent systems, our platform improves forecasting and planning by saving time and money.

## Emissions

Gobuddy owns no vehicles, no warehouses, and has no reliance on fuel. The network connects people moving around to goods moving in the same direction.

## Affordable

Transportation should be fair and affordable. A catalyst for growth not a burden on profitability.

## Empowering

A platform that opens up new markets and new opportunities for your business. Uplifting society.

## Technology

Improved communication and real time monitoring of the delivery journey. Systems to delivery important data in real time.

## The delivery network
