A simple search

Seamless search | Retail API | 20-minute onboarding | Fail safe redirect | Works with couriers | No change to customer check out

Register and install the Gobuddy / WooCommerce API which will only take 20 min.

WOO COMMERCE

When your customer check out and pays, the Gobuddy API searches for a Gobuddy Transporter on the Gobuddy platform.

Transporter found

Goods delivered by Gobuddy transporter. Cost saving, emissions saving, empowering.

OR

Transporter not found

1. Your customer order is automatically redirected to your normal courier, if your store is integrated with your courier.
2. If your store is not integrated with a courier and you do manual deliveries, you will be notified the search has ended and you can go ahead and do your manual delivery.

Goods delivered 100% every time either by Gobuddy or your normal courier.
